Learn About Protect-A-Bed®

It was 1980 in South Africa that SNUGFIT™ was born (SNUGFIT™ is the name of Protect-A-Bed® in Africa and Australia, it is known as Allergen in Europe, SNUGFIT™ was already registered by another product in North America).

Mattresses needed protection and we were encouraged to manufacture 100% cotton Terry toweling waterproof mattress protectors. We set out to make a product, which would help to provide a perfect, healthy and comfortable sleep. After much expense, trial and error, and research and development, the Protect-A-Bed® premium product in its present form was created. The polyurethane laminate can now withstand in excess of 200 washes and tumble dries at boiling point.

A greater awareness of other health aspects, made it even more important to protect mattresses and pillows against dust mite/bed bug infestation, which is a major cause of asthma, allergies and eczema etc.

Protect-A-Bed® being a health product, was produced with care to ensure that the materials used were safe and free of harmful substances like cadmium. The product has been tested to be flame-resistant to a greater extent than the law requires and, with reasonable care, can be used safely in all domestic environments. Our company takes pride in the fact that we receive thousands of unsolicited testimonials from satisfied users in all our markets worldwide. The Protect-A-Bed® promise to consumers is our assurance that we will not compromise on quality. Our focus and dedication is to provide complete customer satisfaction by producing a product that has no equal in the marketplace.

Mattress Covers - Mattress Protectors

Mattress protectors are needed for every bed. Every mattress needs protection from allergens, irritants, liquids and stains, protection that a typical mattress cover may not provide. Protect-A-Bed® mattress protectors provide this protection while keeping your mattress clean and promoting excellent hygiene better than most mattress covers. Protect-A-Bed® mattress protectors help create a dry, allergy-free sleep environment for people of all ages.

Mattress Protectors for the Whole Family

Don't settle for typical mattress covers. Protect-A-Bed® offers a wide range of mattress protectors for beds of all sizes. From a fitted-sheet designed for a crib to mattress protectors that cover California King mattresses, we have the mattress covers to fit your bed. Comfortable, natural cotton toweling over polyurethane film provides a waterproof, stainproof, yet breathable barrier between you and your mattress.

Mattress Covers for Protection and Comfort

Aside from providing protection from allergens and irritants such as dust mites, bacteria and bodily excretions, a Protect-A-Bed® mattress cover also offers superior comfort. Our mattress protectors are fitted-sheet styles that provide super stretch for ultimate comfort and better sleep. Unlike typical mattress pads, Protect-A-Bed® mattress covers encourage health and hygiene and will not change the feel of your mattress.

Mattress Covers for Health and Hygiene

With the benefits of improved hygiene and allergy protection, Protect-A-Bed® mattress covers provide the revitalizing sleep you need. From infancy to adulthood, Protect-A-Bed® mattress protectors are needed to promote a healthy and hygienic sleep environment. Protect-A-Bed® mattress covers not only offer an ideal sleep zone, but our premium products also prolong the life of your mattress. Browse our vast selection of mattress protectors, and you too can look forward to restorative rest.

Mattress encasement for bed bug protection

Protect-A-Bed® mattress encasements feature our Patented BugLock® three-sided zipper system with SecureSeal™. Our allergy control bedding is bed bug entry, escape and bite proof for your mattress. Protect-A-Bed® AllerZip® mattress and box spring encasements are one surefire measure to prevent bed bugs from affecting your life by putting an impenetrable barrier between you and the parasites. In fact, Protect-A-Bed® encasements are the only product scientifically proven and independently tested to eliminate bed bugs from bedding.

AllerZip® - Bed Bug Protection Kit

Fully protect your mattress investment by using Protect-A-Bed® AllerZip® Bed Bug Protection Kit. AllerZip® Bed Bug protection kits give you complete mattress protection for a healthy, Bed Bug free sleep zone. Patented BugLock® (US Patent 7,552,489); three-sided zipper and AllerZip® seal gives you total protection against dust mites, allergens and bed bugs. AllerZip® mattress encasement is completely Bed Bug entry, escape and bite proof.

Complete Mattress Protection From Bed Bugs and Allergens

The AllerZip® mattress protector kits provide your whole family with a clean and healthy sleeping environment. The surface is waterproof and stainproof, featuring our innovative Miracle Membrane® with the Total Heat Transference Formula. Liquids and stains stay out, yet the state-of-the-art AllerZip® mattress protector remains breathable and comfortable.
